EXPERIENCE

Software Engineer for Big Human

Little Rock, AR — 2022 - present

Big Human is a dream team with allstars from top to bottom. They have achieved a diverse workforce. They get projects for innovative software that is an absolute joy to work on. I absolutely love working with such a high performing team. I wake up everyday thrilled to get to work.

Recent Projects

- Carnegie Hall Quiz App (NextJS)
- Pavilion (Webflow)
- FXI (Shopify)
- Feeding South Florida (NextJS, Express, Firebase)

Developer for Lapero

Little Rock, AR — 2022

Lapero became its own company in January 2022. They picked up Element but decided to rebuild as a headless CMS with Wordpress / WooCommerce on the backend and NextJS / React on the frontend. The company does not have much experience with this tech stack. So, I was happy to develop it alongside one of my favorite mentors. I have really enjoyed getting back into the code & building cutting edge software. We broke into new territory with this project. Very exciting!

Director of Element Web Platform MHP/Team SI

Little Rock, AR — 2020-2022

MHP/Team SI brought me back to save a web platform for tractor and heavy equipment dealers. And I did, salvaging 9 clients and adding 11 to the platform. The buglist went from over a hundred to 0. I was also able to work with the development team to architect a Build Your Own Deere feature that works exceptionally well. I also improved many other features that had already been started.

Front End Developer for WorkLove

Little Rock, AR — 2019-2020

At WorkLove, I got a chance to be part of a streamlined development team taking on an array of fun projects that pushed my skills significantly, building confidence and expanding my skill set.

WorkLove Projects

- That's My Best Friend App (React Native)
- AZDoesIt WebApp (React)
- Menus4All Accessibility WebApp (Wordpress)
- Sunbutter Website (Wordpress)

Front End Developer for MHP/Team SI

Little Rock, AR — 2016-2018

After a whirlwind education in the basics of Front End Engineering at The Iron Yard I had the opportunity to dive head first into website construction building beautiful user friendly sites integrated with Content Management Systems including Wordpress, Business Catalyst, & Sitefinity.

Team SI/ MHP Projects

- Arkansas Economic Development Commission (Sitefinity)

- Arkansas Career Education (Sitefinity)
- Flyway Brewing (Wordpress)
- Arkansas Urban Forestry Commission (Wordpress)
- Templated Sites based around a central codebase for Agriculture & Construction Equipment Dealers.(Sitefinity/ Business Catalyst)

Music Enrichment Director, Boys and Girls Club of Central AR

Little Rock, AR — 2006-2016

Created and established a music program for youth ages 6-18 in a method which targeted education/career development, life and leadership skills in a setting with participants from various backgrounds.

Carpenter, J&J Construction

Little Rock, AR — 2001-2005

Residential and commercial framing and remodeling. Constructed decks. Did finish trim work, roofing, tile setting, privacy fence construction, etc.

EDUCATION

The Iron Yard

Degree — 2016

This was an intense workout in skill and in character. My track was focused on user interaction and thinking like an engineer, tackling hard problems with an inspiring mentor, learning to deliver the data to the end user with the best possible experience.

SKILLS

- Highly skilled in HTML5, CSS3, Sass, Javascript, ReactJS, NextJS, Express, AngularJS, VueJS, & Webflow, Shopify & Webpack
- Proficient in C#, PHP, Wordpress, WooCommerce & the Adobe Suite
- Strong skills in design, drawing, painting, photography, & video editing
- Audio engineering expertise in Protools, Logic, & Reason
